

(b) Amendments to the Claims

A detailed listing of the claims is provided which replaces all earlier versions.

Claims 1.-3. (Cancelled)

4. (Currently Amended) An organic light-emitting device comprising a pair of electrodes consisting of an anode and a cathode and organic compound-containing layers sandwiched between the pair of electrodes, wherein (a) at least one layer of the organic compound-containing layers contains

at least one compound selected from the group consisting of compounds represented by the following general formula:

wherein

Y<sub>1</sub> and Y<sub>3</sub> can be bonded to Y<sub>2</sub> and Y<sub>4</sub> respectively to form a ring;

Y<sub>1</sub> to Y<sub>4</sub> are the same or different and are each independently a group selected from the group consisting of alkyl, aralkyl, aryl, heterocyclic, amino, silyl, alkylene, aralkylene, alkenylene, imino, -SiH<sub>2</sub>-, silylene, carbonyl, ether and thioether, each having no substituent or a substituent which can include a linking group consisting of arylene or divalent heterocyclic, each having no substituent or a substituent; and

at least one compound selected from the group consisting of compounds represented by the following general formula [5]:

wherein  $Ar_{13}$  to  $Ar_{16}$  are the same or different and are each independently a group selected from the group consisting of aryl and heterocyclic, each having no substituent or a substituent at least one of  $Ar_{13}$  to  $Ar_{16}$  is selected from the group consisting of fluorenyl, bifluorenyl, phenanthrenyl, acridinyl, pyrenyl, perylenyl, phenyl having a fluorenyl group, phenyl having a pyrenyl group, phenyl having a perylenyl group, and phenyl having a carbazolyl group and any one to three of  $Ar_{13}$  to  $Ar_{16}$  can be hydrogen or a group selected from the group consisting of alkyl and aralkyl, each having no substituent or a substituent; and  $R_{15}$  to  $R_{18}$  are the same or different and are hydrogen, halogen, cyano, a substituted amino or a group selected from the group consisting of alkyl, aralkyl, aryl and heterocyclic, each having no substituent or a substituent; and

(b) at least one layer of the organic-compound containing layers is a light-emitting layer.

5. (Currently Amended) An organic light-emitting device comprising a pair of electrodes consisting of an anode and a cathode and ~~an~~ organic compound-containing layer layers sandwiched between the pair of electrodes, wherein

(a) at least one layer of the organic compound-containing layers contains

at least one compound selected from the group consisting of compounds represented by the following general formula:

wherein

$Y_1$  and  $Y_3$  can be bonded to  $Y_2$  and  $Y_4$  respectively to form a ring;

$Y_1$  to  $Y_4$  are the same or different and are each independently a group selected from the group consisting of alkyl, aralkyl, aryl, heterocyclic, amino, silyl, alkylene, aralkylene, alkenylene, imino,  $-\text{SiH}_2-$ , silylene, carbonyl, ether and thioether, each having no substituent or a substituent which can include a linking group consisting of arylene or divalent heterocyclic, each having no substituent or a substituent; and

at least one compound selected from the group consisting of compounds represented by the following general formula [6]:

wherein  $R_{19}$  and  $R_{20}$  are the same or different and are hydrogen or a group selected from the group consisting of a alkyl, aralkyl and aryl, each having no substituent or a substituent; any pair of  $R_{19}$  combined to their respective fluorene structures are the same or different to each other; any

pair of R<sub>20</sub> combined to their respective fluorene structures are the same or different to each other; R<sub>21</sub> to R<sub>24</sub> are hydrogen, halogen, cyano, a substituted silyl or a group selected from the group consisting of alkyl, aralkyl and alkoxy, each having no substituent or a substituent; and p is an integer from 2 to 10; and

(b) at least one layer of the organic compound-containing layers is a light-emitting layer.

Claims 6. - 17. (Cancelled)

18. (Previously Presented) The organic light-emitting device according to claim 4, at least one of Y<sub>1</sub> and Y<sub>2</sub> is substituted or unsubstituted phenyl; and at least one of Y<sub>3</sub> and Y<sub>4</sub> is substituted or unsubstituted phenyl.

Claim 19. Cancelled)

20. (Previously Presented) The organic light-emitting device according to claim 5, at least one of Y<sub>1</sub> and Y<sub>2</sub> is substituted or unsubstituted phenyl; and at least one of Y<sub>3</sub> and Y<sub>4</sub> is substituted or unsubstituted phenyl.
